### Description

Prerequisites:

To achieve this functionality, the user must meet several mandatory conditions:

A.To have already created an active and valid account within the sales platform

B. To successively execute the steps below,

1. Internet access
2. Access to the application
3. We open the browser and navigate to the application site<<https://www temu.com/>>
4. The user is successfully logged in and redirected to the home page.
5. We navigate to the section<**Your payment methods**>
6. \*From this point we will add the personal data in the fields that the platform suggests to us to complete the

-enter your name in capital letters

-enter your card number

-enter your security code if applicable (the code we communicated to the bank issuing the card, where you created the card)

- After completing these steps, the payment method will be automatically saved in the platform's database.

**Description**

The site <<https://www temu.com/>> is an online platform (e-commerce platform) in which any person, as a customer, can access it in the online environment both on a portable electronic device ( mobile phone, smartphone) as well as after a less portable device (home personal computer or laptop), the only condition being a good internet connection.

Any person as a user can create an account on this platform by filling in personal data, accessing the "My Account" section located in the upper right part of the page, and clicking on the <Sign in/ Register Orders & Account> button.

After performing these steps, the user will receive a confirmation email on the email address (the email address must be a valid email address and must match the email address you used when you created the account) and below you will have your login data (email and password) and a link that will direct you to the account login page.

After performing these steps, the user will receive a confirmation email on the email address (the email address must be a valid email address and must match the email address you used when you created the account) and below you will have your login data (email and password) and a link that will direct you to the account login page.

The platform works permanently 24 hours a day and can be accessed from any corner of the world.

If you have placed an order and the order confirmation email (which contains the invoice, delivery date, and the courier company that must pick up and deliver the package to your home) does not arrive within 20 of minutes, please contact the customer relations service immediately.

It is possible that due to the very large number of orders, the platform will delay the processing of the orders, and your parcel will remain in the warehouse for a longer period until it is picked up by a courier company (the courier company that was supposed to pick up the parcel, or refused the package for various reasons, or has a very large number of requests and cannot deal with it)
